

Ethan Reece

contact@ethanreece.com

(208) 515-2094

Richardson, TX

<https://ethanreece.com/>

Skills

DevOps and System Administration Linux, Git, GitHub Actions, Docker, Guix
Programming Languages JavaScript, C#, Java, C, C++, Guile/Scheme
Layout and Web Development HTML, CSS, React, ASP.NET, Express.js, Astro, Typst

Education

The University of Texas at Dallas
Bachelor of Science in Computer Science

May 2026
Current GPA: 3.749

- Collegium V Honors Program
- Relevant Coursework

Completed Programming Language Paradigms, Digital Logic & Computer Design, Operating Systems Concepts, Probability and Statistics for CS, Data Structures and Algorithms, Software Engineering, C/C++ Programming in UNIX, Computer Architecture, Discrete Mathematics II

Current Database Systems, Advanced Algorithm Design & Analysis

Work Experience

Scrumfish Software Nampa, ID
Software Engineering Intern

June – August (2022, 2023)

C#/ASP.NET, JavaScript/React, Microsoft SQL Server, GitHub

- Developed ASP.NET APIs for data management, multifactor authentication, and document conversion.
- Created a React-based UI for a book critique platform, supporting document viewing, sharing, and annotation.
- Automated the update of email templates in the database using SQL and PowerShell scripts.

R-Technics Boise, ID
Software Engineering Intern

June – August (2022, 2023)

Azure, Windows Server, Docker, C#/ASP.NET

- Supported server maintenance through update research, implementation, and monitoring.
- Developed a C# program to fetch song lyrics and metadata from an API, later integrated into the main product.
- Enhanced a server application with Docker and Linux support; established an Azure DevOps pipeline for build automation.

Professional Development

Personal Server Administration
Personal Project

2020 – Present

Linux, Docker, Guix/Guile, Git, Proxmox, Google Cloud

- Manage a physical server using Proxmox, Debian VMs, and Docker for several applications.
- Migrate new applications to Guix to utilize declarative configuration for reduced state, fine-grained system control, and increased resource efficiency.
- Implement a VPN via Google Cloud Compute Engine to navigate CGNAT limitations.
- Host various services including Forgejo, TrueNAS, Nextcloud, and Vaultwarden.

Cybersecurity Courses
CodePath CYB101, CYB102

February 2023 – November 2023

Linux

- Gained knowledge in cybersecurity tools and defense strategies.
